

2021

State of Unstructured Data Management

Komprise hired a third-party to survey IT and storage directors at large enterprises in the U.S. and U.K., in June 2021. The survey covers unstructured data growth and storage trends plus goals and challenges for data management.

65%

of organizations **spend more than 30%** of IT budget on data storage/ data management.

#1

roadblock is **lack of visibility** for managing rising storage and backup costs.

56%

say migrating more data to the cloud is their **top cloud priority**.

70%

face **unstructured data management challenges** with rising costs, lack of visibility, and lack of sufficient tools.

45%

prioritize analytics as the first area of investment.
